# Contacts

Contacts represent individual people within a company/organization that you're selling to.

Each contact belongs to exactly one Lead and can contain multiple phone numbers, email addresses and URLs, and be associated with one or more Contact Custom Fields.

To easily find contacts that match specific conditions, use the [Advanced Filtering API](#).

## List contacts.

GET /contact/

▼

Example Request/Response

## Create a new contact.

POST /contact/

▼

Example Request/Response

## Fetch a single contact.

GET /contact/{id}/

▼

Example Request/Response

## Update an existing contact.

PUT /contact/{id}/

If you're trying to update a custom field and that custom field accepts multiple values, you can also specify `.add` or `.remove` as part of the field key to add/remove a single value to/from a list of values, e.g.:

Copy

```
1 { "custom.cf_v6S011I6MqcbVvB2FA5Nk8dr5MkL8sWuCIG8cUle09c.add": "Wednesday" }
```

adds "Wednesday" to the list of values which already exist on the given contact.

▼

Example Request/Response

## Delete a contact.

DELETE /contact/{id}/

▼

Example Request/Response
