Users

Users represent Close user accounts, usually your co-workers / sales reps inside your company/organization.

Fetch information about yourself.

`GET /me/`

This is a special instance of `/user/{your_user_id}/`. Good for determining the `id` of the Organization you are in.

⌄ Example Request/Response

Fetch a single user.

`GET /user/{id}/`

⌄ Example Request/Response

List all the users who are members of the same organizations as you are.

`GET /user/`

⌄ Example Request/Response

Fetch the availability statuses of all users within an organization.

`GET /user/availability/{?organization_id}`

The `active_calls` field is an array of call metadata for calls that the user is currently participating in.

⌄ Example Request/Response
